

# Garden Watering Frequency

**School Name:**

## Watering Tips:

- ~Check water moisture by sticking your finger into the soil 2-3 inches. If moist, don't water.
- ~Check local weather forecast for rain before watering.
- ~Water the roots, not the leaves.
- ~Water in the morning or afternoon.
- ~If plants' foliage begins to brown at the edges and fall from the plant, you may be overwatering!

Twice a Week	Once a Week	10 Days to 2 Weeks
